

Time Stamps

Models S2, S14, and S32

 Simplex

Time Stamp Specifications

Product Description:

Time Stamps from Simplex are versatile in function and rugged in design. Fast and efficient, Simplex time stamps imprint time, date, number and/or comment onto any document. With our three standard models, S2, S14, and S32, Simplex time stamps can handle virtually all your time stamp needs.

The S2 is our basic time stamp model which prints both date and time. The S14 is a version of our S2, and also includes an LED clock display for viewing the time. The S32 is a numbering stamp, which imprints date, time, and a six digit number.

For specialized applications, our base models can be configured with various options to customize the functionality of each stamp for your individual needs. (See *Custom Options* section.)

Applications:

Simplex time, date, and numbering stamps are the answer for many documentation and control applications.

Banks: validate deposit slips or record entries into safety deposit boxes.

Mail Room: record the receipt or transmission of all printed correspondence.

Hotels: document receipts, reservations, requests for room service, personal messages, laundry, and other services.

Restaurants: document customer orders during peak demand periods, improve service, control labor cost and employee productivity.

Stock Brokerages: register the purchase and sale of securities.

Hospitals: establish time and date of arrival to emergency room, admittance, X-ray or clinics. Identify laboratory in/out times.

Offices and Schools: document receipt of printed material and departure of students.

Custom Inscription Dies

Inscription dies are custom engraved plates that conveniently mount above and/or below the typewheels, and allow you to print "your own custom message" when each document is stamped. Up to five lines of 22 characters are available on each inscription die. Your Simplex representative will help you design a custom inscription for your application.
