Stamps**

Numberall Rotary Stamp – Single Wheel

A strongly constructed, well balanced, handy hand stamp made of the finest steels for the purpose, with characters engraved for maximum stamping service and legibility.

Scientifically hardened and tempered in thermostatic controlled electric furnaces, carefully inspected and tested to insure long stamping life.

Changes of characters are quickly made merely by rotating the type wheel with thumb and forefinger.

Also available with shank for press use.

Rotary Date Stamp

Model 36 B - 3/16" Size

Much used for dating Batteries etc. Wheels are easily turned to the desired month and year. A hammer is used to make the impression. Can be used 6 years, after that we can supply a new wheel for 6 more years.

Multi-Wheel Rotary Stamp – Model 60

A new Rotary Stamp of simplified construction which performs similar to Numbering Machines, but is lower in cost.

Instead of retaining pawls, pawl block and bronze spring used to keep the wheels in proper places. A Single Locking Pin thrust through the frame and fitting into wheel slots holds the wheels in place and in perfect alignment.

The stamp is made with hand shank for hammer stamping. The Model 60 is light and compact and ideal for stamping all kinds of products and parts of light metals, unhardened steel, etc., where a permanent mark is desired.

CHARACTER SIZES AVAILABLE

1/16" 3/32" 1/8" 5/32" 3/16"

Wheel Capacity: 5 Wheels Maximum

To set wheels in position remove pin to free all wheels. Push pin back into frame until it touches first wheel. Now set first wheel to desired number, advance pin through first wheel to lock in place. Repeat same action for remaining wheels. A little practice will enable you to set any number quickly.

11 Division Wheels
