

**Software that
puts you
in control**

Badges ToGo™ Software Templates allow you to provide your own personalized badge inserts ... the way you want them ... when you want them ... and it's easy! The software has been designed to integrate seamlessly with WordPerfect for Windows or Microsoft Word for Windows. You can even import names from a data file.

Badges ToGo™ Software Templates are a system of macros, templates and definition files designed to help you produce your own inserts for Toronto Stamp's Window and Meeting Badges. This product is designed to integrate seamlessly with your copy of WordPerfect for Windows or Microsoft Word for Windows.

The **Badges ToGo™ Software Templates** perform a number of functions: using a number of pre-determined layouts, they allow you to produce name inserts either from a data file (using any of the different data types that WordPerfect or Microsoft Word is able to import) or directly from the keyboard. Using Toronto Stamp Badge Insert Sheets and your laser printer, you can print Badge Inserts for one person, a group, a department or a complete organization quickly, easily and professionally. A short tutorial is also included, which shows how to merge a data file into a new badge template.

Badges ToGo™ Software Template Manual

- Contents:
1. Introduction
 2. Overview
 3. Installing your software
 4. Running the Installation Macro
 5. Using the software
