OPERATING MANUAL
MAN-137
... Metal Tapewriter

The M1011 Labelmaker can create a wide variety of metal labels and tags. The Labelmaker embosses ³/₁₆" characters on 12mm (¹/₂") metal label tapes (0.008" thick): Aluminum (with adhesive), Aluminum (without adhesive) and Stainless Steel (without adhesive). You can also use a Reverse Image Wheel which allows you to print mirror image labels used on molds or casts for metal or rubber injection molding, silicone casting, fibre glass applications, etc. A built-in punching device allows you to punch one or two holes (³/₃₂" diameter) in non-adhesive labels that can be attached with screws, nails, rivets and metal or plastic wires or ties. In addition, you can also punch a cable tie slot in one or both ends of the label for cable marking.

M1011 Metal Tapewriter. Includes one horizontal wheel, one reverse image wheel, one roll of 12mm (¹/₂") Aluminum Tape (without adhesive), one roll of 12mm (¹/₂") Stainless Steel Tape (without adhesive) and a heavy-duty molded plastic carrying case. **Price ... \$ 386.80**

Metal Tape
