

## Custom Tactile Facility Signs

Tactile signs provide a functional, high-visibility way of meeting the needs of the visually impaired. Made of 1/16" thick acrylic plastic with 1/32" raised copy (black or white) and Grade I or Grade II braille (clear, black, white acrylic or stainless steel). Square or round corners. Double-sided tape or holes to suit. Available in 6 background colours: black, grey, blue, taupe, gold or silver.

... ADA Standards

Delivery 5 days

**Custom Plastic Tactile Signs.** Sans serif typestyle, 5/8" minimum character height, all upper case. Prices each sign.
