

## Slatz Sign System

The Slatz System combines extruded aluminum shapes and injection molded plastics into a unique system of interchangeable components for the fabrication of directories, wall and door signs, projecting or suspended signs. Flexibility is the key to the system. Architects and designers throughout the world have specified Slatz to create original and fully co-ordinated sign systems for the most prestigious projects. The Slatz System is only as limited as the imagination of the user.

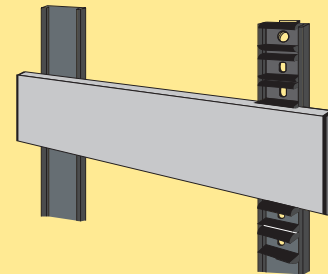

### Single Slatz

Black molded plastic End Caps are mounted onto door or wall. Extruded aluminum Faceplates snap onto caps for concealed installation of single faceplates.

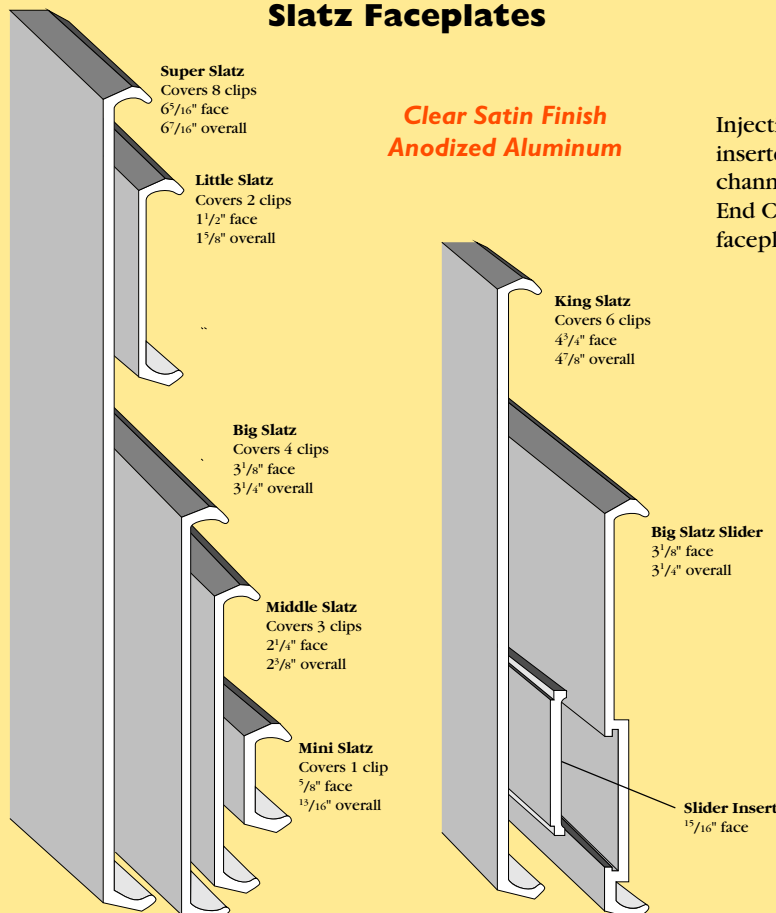

### Groups of Slatz
